

PERFORMANCE DEFENSE

5G COMMUNICATION DEVELOPMENT KIT

Accelerate your 5G Go-To-Market Strategy...

Performance Defense offers a 5G-enabled communications development kit to support a wide array of connectivity and data storage solutions for mission critical applications. Powered with an ARM Cortex-A53 quad core CPU architecture enables hardware partitioned access and the flexibility for the most demanding applications. Safely and rapidly produce your next communications gateway and enjoy the lowest unit and overall cost.

*5G CyberServer
Development Kit*

SECURITY

Designed and hardened with the highest security considerations. This includes Red/Black Architecture, hardware-based root of trust using a built-in Trusted Platform Module, device level security mechanisms and operating system security.

HIGH PERFORMANCE COMPUTING

Provides data to support processing at the Edge in support of analytics and more as required by today's demanding applications. This includes a quad core, multi-threaded processor, high speed memory and storage, and expansion capability.

REAL-TIME CONNECTIVITY

The 5G CyberServer connects and exchanges data between infrastructure, devices, and people through 4G/5G, WiFi, Bluetooth, SATCOM (Optional), and Gigabit wired ethernet.

TRUSTED & CERTIFIED

Developed with the highest level of quality, safety, and reliability considerations. The Made-in-USA solution was developed by top-tier product development teams using high quality management systems, manufacturing, and product delivery – “ready for certification”.
