

EDGE 5G-X SUITE

5G Communication Solutions For Mission-Critical Connectivity Applications

EDGE DEVELOPMENT KIT

The EDGE Development Kit leverages the EDGE Card and adds powerful instrumentation including JTAG. This hardware & software offering provides developers with “hands on” experience to test and integrate 5G and other technology.

EDGE 5G-X

A certifiable, small form factor heterogeneous communications device offering an open platform application (AI/ML) environment. Designed for the most extreme environments, the EDGE 5G-X can be customized to meet your needs.

EDGE CARD

A single PCB solution loaded with features from the EDGE innovation stack. Built for easy integration into an existing solution, the EDGE Card is best for system integrators who want to accelerate their 5G mission.

Edge Agile

Finally, customizable COTS solutions to operate at the edge for uninterrupted connectivity, communications, data exchange, artificial intelligence/machine learning-enablement and more.

Heterogeneous Connectivity

Effortlessly connects and exchanges data between IoT devices, sensors, and systems through 4G/5G, WiFi, Bluetooth, SATCOM, and Gigabit wired ethernet.

Secure

Designed and hardened with the highest security considerations including red/black architecture, hardware-based root of trust, device level security mechanisms and operating system security.

Trusted & Certifiable

Made in the USA by top-tier product development teams using high quality management systems, manufacturing, and product delivery – “ready for certification”.

WHERE'S YOUR EDGE?

From long-range resilient communications systems for the digital battlefield, to artificial intelligence/machine learning enablement for the energy and manufacturing sectors, the EDGE 5G-X Suite can be customized to meet various market applications.

Sectors:

- ✓ Defense
- ✓ Advanced Manufacturing
- ✓ Smart Cities
- ✓ Energy
